

HI-LO

The most fuel efficient travel trailer introduces the SL and SLX Super Lightweights for small cars.

Travel up to 50% farther on a tank of gas with safety and peace of mind. Get more family camping fun per gallon.

HI FOR LIVING — LO FOR TRAVEL

HI-LO's proven fuel efficiency, safety, durability and comfort features are incorporated into this all new 16' lightweight designed for travel with cars rated to tow up to 2,000 lbs. (can be towed by larger vehicles, too). The SL has a dry weight of just 1,600 lbs. and the SLX (with refrigerator, shower, hot water heater, toilet and furnace) weighs 1,800 lbs.

Fuel Efficiency

HI-LO's low travel profile, aerodynamic design and light weight reduce air drag up to 70% and can mean up to 50% savings on your gasoline bills.

Superior Stability For Safe, Easy Travel

Unlike other lightweights, HI-LO's low travel profile gives you peace of mind and stability while traveling. No sway or buffeting caused by passing trucks or cross winds.

The cubic area of most light "uprights" is too large to be safely towed behind many smaller cars. Most of them cause an "umbrella" effect. An umbrella is light weight but in a strong wind, it's impossible to use. The same applies to most "uprights". HI-LO's low travel profile assures stability and safety while traveling.

Rugged, Durable Construction

No need to compromise with flimsy walls and ceilings. HI-LO uses its super strong Snyderized construction on the SL and SLX. Sides and ceilings are our solid, durable 4-ply sandwich construction method. And we have a full length lightweight chassis with rear bumper.

Roominess, Livability and Comfort

Compare HI-LO's interior livability features. You'll find maximum roominess, ingenious use of space and every convenience for fun-filled family camping. Plus a host of optional equipment. Sleeps 4-5.

Lifting and Lowering System

Low travel profile is even more important in a lightweight unit for fuel efficiency and safe, easy towing. An easy-to-use manual lift is standard; an automatic lift is optional.

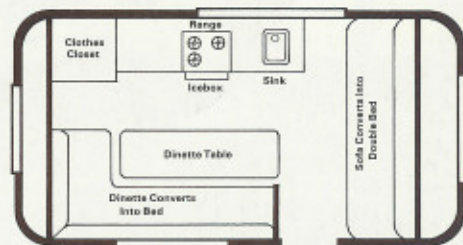

When you get to where you're going, just flip a switch (or turn a crank if you wish) and your HI-LO is ready for use in about 60 seconds. Nothing to fold. No canvas or vinyl to get wet. No waiting or inconvenience.

And the SL and SLX are garageable. Just lower the top section and back it into your garage. Saves renting storage space and it's always right there for your immediate pleasure.
